Maksim Kunaev

Senior Full-Stack Engineer · building AI products end-to-end

Madrid, Spain · termuovex@gmail.com · maksimkunaev.com · github.com/maksimkunaev · linkedin.com/in/maksim-k-1a9451163

SUMMARY

Full-stack engineer: six years of frontend, since 2025 full stack with AI — agents, retrieval, voice, image and video generation, built for clients and running in production. A model only where it beats code; every step has a contract you can check.

SKILLS

AI	LLM tool calling, RAG, Multi-step pipelines, OpenAI / Groq APIs, Local models (Ollama, llama.cpp), Fine-tuning (Qwen, PyTorch), Whisper
Frontend	React, TypeScript, Vue, Next.js, Nuxt, Angular, Redux / MobX
Backend	Python (Flask, FastAPI), Node.js, PostgreSQL, MongoDB, REST, WebSockets
Delivery	Docker, nginx, GitHub Actions, Jest / Vitest / Cypress
Languages	English (fluent), Russian (native), Spanish (basic), Serbian-Croatian (intermediate)

EXPERIENCE

Full-Stack & AI Engineer · Freelance · Remote — Feb 2025 – Present

- Long-term contract (Sep 2025 – present): full web app from scratch — React, Python, nginx deploy — with AI image and video generation inside; e-commerce and social platform integrations.
- AI chat assistant from scratch: intent → parameters → API actions (React, Node.js, OpenAI function calling).
- RAG document Q&A: frontend and retrieval layer, agent memory.
- Vibe-coded Chrome extension taken to production: failure cases fixed, capture flow rebuilt as a reliable event stream.
- Whisper, ElevenLabs and image generation in client apps; local models fine-tuned and served (Qwen, Ollama, llama.cpp).

Frontend Engineer · PriceHubble · Remote — Oct 2021 – Feb 2025

- Led frontend performance improvements: implemented lazy loading, reducing render time from 1–2 minutes to under 5 seconds.
- Delivered 40+ new product features and improved customer experience.
- Collaborated with backend teams to integrate REST and SOAP APIs, reducing error rates by 30%.
- Authored 15-page technical documentation, reducing onboarding time by 40%.

Frontend Developer · Realtify / Westarp · Remote — Nov 2019 – Oct 2021

- Directed frontend architecture using Vue.js and Vuex; built 20+ responsive UI pages.
- Engineered real estate dashboard with animated data visualization layers.

React Developer · LATOKEN · Moscow — Sep 2018 – Aug 2019

- Built scalable React.js dashboards and order forms, improving load time 2–3×.
- Delivered 50+ new features using Redux-based state management.

RESEARCH

Aion — Symbolic Reasoning Playground · maksimkunaev.com/#research — 2024 — present

Experiments on one question: how to make an agent reliable — explicit state, explicit rules, and code that checks the model instead of the model checking itself. Live demo on the site.

EDUCATION

Novosibirsk State Technical University — Electronics and Microelectronics (Incomplete Higher Education), 2014
